Journal of Organometallic Chemistry

Subject index of Volume 567

Activated thiophenes
Extension of the Heck reaction to the arylation of activated thiophenes, 49
Acyl complexes
Electron transfer catalysis of the hydrogenolysis of acyl dicarbonyl cyclopentadienyliron complexes by tributyltin hydride, 25
Acysilanes
Newly designed acylsilanes as versatile tools in organic synthesis, 181
Alkoxy carbenes
Interaction of dihydropyridines with alkoxycarbene complexes of tungsten: formation and use as cyclopropanation reagents of pyridinium ylid complexes, 119
Alkyl halides
Organosamariums: preparation using diiodosamarium and reactivity in tetrahydropyran, 39
Alkyne insertions
Reaction of aminocarbene complexes of chromium with alkynes 10. From large to small cyclic amines: single versus double alkyne insertions, 83
Reaction of aminocarbene complexes of chromium with alkynes 9. From nitrogen ylid complexes toward alkaloid frameworks, 101
Allylic alkylation
Mono and diphosphine borane complexes grafted on polypyrrole matrix: direct use as supported ligands for Rh and Pd catalysis, 219
Allylic halides
Organosamariums: preparation using diiodosamarium and reactivity in tetrahydropyran, 39
Aminoacetals
Stereoselective synthesis of γ-aminoallyltins from vinyltin acetals, 21
γ-Aminoallyltins
Stereoselective synthesis of γ-aminoallyltins from vinyltin acetals, 21
Aminocarbenes
Reaction of aminocarbene complexes of chromium with alkynes 10. From large to small cyclic amines: single versus double alkyne insertions, 83
Reaction of aminocarbene complexes of chromium with alkynes 9. From nitrogen ylid complexes toward alkaloid frameworks, 101
Arylation
Extension of the Heck reaction to the arylation of activated thiophenes, 49
Stereochemistry in palladium- and nickel-catalyzed addition of phenylmagnesium bromide to unsaturated carbohydrates, 157
Asymmetric catalysis
New screening methodologies or combinatorial chemistry applied to asymmetric catalysts, 3
Asymmetric catalytic hydride transfer reduction of ketones
Optically active nitrogen ligands in asymmetric catalysis. Effect of nitrogen substitution on the enantioselective hydride transfer reduction of acetophenone, 133
Aza ligands
Optically active nitrogen ligands in asymmetric catalysis. Effect of nitrogen substitution on the enantioselective hydride transfer reduction of acetophenone, 133
Azide
Hydroboration–azide alkylation as efficient tandem reactions for the synthesis of chiral non racemic substituted pyrrolidines, 31

Batch reactor
New reactors and methods for the investigation of homogeneous catalysis, 143
Benzylic halides
Organosamariums: preparation using diiodosamarium and reactivity in tetrahydropyran, 39
Boron
Synthesis of borylindenides; structure of [Li(N,N',N''-Me_3-1,3,5-$C_3H_6N_3$)][1-C_9H_6{$B(NMe_2)_2$}], 127
Borylindene
Synthesis of borylindenides; structure of [Li(N,N',N''-Me_3-1,3,5-$C_3H_6N_3$)][1-C_9H_6{$B(NMe_2)_2$}], 127
Borylindenide
Synthesis of borylindenides; structure of [Li(N,N',N''-Me_3-1,3,5-$C_3H_6N_3$)][1-C_9H_6{$B(NMe_2)_2$}], 127

Carbonyl
Cyclomanganated (η^6-arene)tricarbonylchromium complexes: synthesis and reactivity, 65
Catalysts
Enantioselective ruthenium-mediated hydrogenation: developments and applications, 163
C–C coupling
Titanocene and zirconocene complexes in phosphinine chemistry, 151
Chemioselectivity
Newly designed acylsilanes as versatile tools in organic synthesis, 181
Chiral ferrocenes
Selective synthesis of ferrocenes, 191
Chiral ferrocenophanes
Selective synthesis of ferrocenes, 191
Chiral ligand
New screening methodologies or combinatorial chemistry applied to asymmetric catalysts, 3
Chiral phophorus(III) triflates
Chiral phosphorus(III) triflates. On the nature of the phosphorus–oxygen interaction, 199
Chiral rhenium complexes
New chiral rhenium complexes of unsaturated alcohols: preparation and reactivity, 75
Chromium
Cyclomanganated (η^6-arene)tricarbonylchromium complexes: synthesis and reactivity, 65
Reaction of aminocarbene complexes of chromium with alkynes 10. From large to small cyclic amines: single versus double alkyne insertions, 83

PII S0022-328X(98)00862-6

Reaction of aminocarbene complexes of chromium with alkynes 9. From nitrogen ylid complexes toward alkaloid frameworks, 101
Combinatorial chemistry
New screening methodologies or combinatorial chemistry applied to asymmetric catalysts, 3
Coupling reaction
Mono and diphosphine borane complexes grafted on polypyrrole matrix: direct use as supported ligands for Rh and Pd catalysis, 219
Coupling reactions
Synthesis of enynes and epoxyenynes by coupling: use of a new set of catalysts based on Pd–Ag salts, 173
Crystal structure
Synthesis of borylindenides; structure of [Li(N,N',N''-Me_3-1,3,5-$C_3H_6N_3$)][1-C_9H_6{$B(NMe_2)_2$}], 127
Cyclic voltammetry
Electron transfer catalysis of the hydrogenolysis of acyl dicarbonyl cyclopentadienyliron complexes by tributyltin hydride, 25
Cycloadditions
Titanocene and zirconocene complexes in phosphinine chemistry, 151
Cyclometallation
Cyclomanganated (η^6-arene)tricarbonylchromium complexes: synthesis and reactivity, 65
Cyclopropanations
Interaction of dihydropyridines with alkoxycarbene complexes of tungsten: formation and use as cyclopropanation reagents of pyridinium ylid complexes, 119

Diastereoselectivity
New chiral rhenium complexes of unsaturated alcohols: preparation and reactivity, 75
Dienone
Activation and regioselective *ortho*-functionalization of phenols promoted by 'Cp*Ir' fragment: synthesis, structures and applications to organic synthesis. Cp* = C_5Me_5, 57
Dihydropyridines
Interaction of dihydropyridines with alkoxycarbene complexes of tungsten: formation and use as cyclopropanation reagents of pyridinium ylid complexes, 119
Diiodosamarium
Organosamariums: preparation using diiodosamarium and reactivity in tetrahydropyran, 39
Dynamic kinetic resolution
Enantioselective ruthenium-mediated hydrogenation: developments and applications, 163

Electron transfer catalysis
Electron transfer catalysis of the hydrogenolysis of acyl dicarbonyl cyclopentadienyliron complexes by tributyltin hydride, 25
Enynes
Synthesis of enynes and epoxyenynes by coupling: use of a new set of catalysts based on Pd–Ag salts, 173
Epoxide
Synthesis of enynes and epoxyenynes by coupling: use of a new set of catalysts based on Pd–Ag salts, 173

Fast screening
New screening methodologies or combinatorial chemistry applied to asymmetric catalysts, 3

Grignard reagents
Stereochemistry in palladium- and nickel-catalyzed addition of phenylmagnesium bromide to unsaturated carbohydrates, 157

Heck reaction
Extension of the Heck reaction to the arylation of activated thiophenes, 49
Hemilabile ligand
Complexation on rhodium of bidentate and potentially hemilabile phosphorous ligands, 13
Homogeneous catalysis
New reactors and methods for the investigation of homogeneous catalysis, 143
New types of hydrogen bonds, 7
Hydroformylation
Complexation on rhodium of bidentate and potentially hemilabile phosphorous ligands, 13
Hydrogenation
Enantioselective ruthenium-mediated hydrogenation: developments and applications, 163
Mono and diphosphine borane complexes grafted on polypyrrole matrix: direct use as supported ligands for Rh and Pd catalysis, 219
Hydrogen bonding
New types of hydrogen bonds, 7

Iridium
Activation and regioselective *ortho*-functionalization of phenols promoted by 'Cp*Ir' fragment: synthesis, structures and applications to organic synthesis. Cp* = C_5Me_5, 57
Iron
Electron transfer catalysis of the hydrogenolysis of acyl dicarbonyl cyclopentadienyliron complexes by tributyltin hydride, 25
Selective synthesis of ferrocenes, 191

Kinetics
New reactors and methods for the investigation of homogeneous catalysis, 143

Liquid/liquid catalysis
New reactors and methods for the investigation of homogeneous catalysis, 143

Manganese
Cyclomanganated (η^6-arene)tricarbonylchromium complexes: synthesis and reactivity, 65
Mechanism
Optically active nitrogen ligands in asymmetric catalysis. Effect of nitrogen substitution on the enantioselective hydride transfer reduction of acetophenone, 133

Nano-building blocks
New synthesis of the nanobuilding block $\{(BuSn)_{12}O_{14}(OH)_6\}^{2+}$ and exchange properties of $\{(BuSn)_{12}O_{14}(OH)_6\}(O_3SC_6H_4CH_3)_2$, 137
Nickel
Stereochemistry in palladium- and nickel-catalyzed addition of phenylmagnesium bromide to unsaturated carbohydrates, 157
Nitrogen-containing heterocycles
Reaction of aminocarbene complexes of chromium with alkynes 10. From large to small cyclic amines: single versus double alkyne insertions, 83
NMR spectroscopy
Chiral phosphorus(III) triflates. On the nature of the phosphorus–oxygen interaction, 199
Non-racemic
Hydroboration–azide alkylation as efficient tandem reactions for the synthesis of chiral non racemic substituted pyrrolidines, 31

Nucleophilic *ortho*-functionalization
Activation and regioselective *ortho*-functionalization of phenols promoted by 'Cp*Ir' fragment: synthesis, structures and applications to organic synthesis. $Cp^* = C_5Me_5$, 57
N-ylide complexes
Reaction of aminocarbene complexes of chromium with alkynes 9. From nitrogen ylid complexes toward alkaloid frameworks, 101

One pot synthesis
Selective synthesis of ferrocenes, 191
Organoborane
Hydroboration–azide alkylation as efficient tandem reactions for the synthesis of chiral non racemic substituted pyrrolidines, 31
Organosamariums
Organosamariums: preparation using diiodosamarium and reactivity in tetrahydropyran, 39
Oxidation
New chiral rhenium complexes of unsaturated alcohols: preparation and reactivity, 75
Oxo-dienyl
Activation and regioselective *ortho*-functionalization of phenols promoted by 'Cp*Ir' fragment: synthesis, structures and applications to organic synthesis. $Cp^* = C_5Me_5$, 57
Oxo-hydroxo organotin clusters
New synthesis of the nanobuilding block $\{(BuSn)_{12}O_{14}(OH)_6\}^{2+}$ and exchange properties of $\{(BuSn)_{12}O_{14}(OH)_6\}(O_3SC_6H_4CH_3)_2$, 137

Palladium
Stereochemistry in palladium- and nickel-catalyzed addition of phenylmagnesium bromide to unsaturated carbohydrates, 157
Synthesis of enynes and epoxyenynes by coupling: use of a new set of catalysts based on Pd–Ag salts, 173
Palladium catalysts
Mono and diphosphine borane complexes grafted on polypyrrole matrix: direct use as supported ligands for Rh and Pd catalysis, 219
Phenol
Activation and regioselective *ortho*-functionalization of phenols promoted by 'Cp*Ir' fragment: synthesis, structures and applications to organic synthesis. $Cp^* = C_5Me_5$, 57
Phosphine boranes
Mono and diphosphine borane complexes grafted on polypyrrole matrix: direct use as supported ligands for Rh and Pd catalysis, 219
Phosphinines
Titanocene and zirconocene complexes in phosphinine chemistry, 151
Phosphonate
Complexation on rhodium of bidentate and potentially hemilabile phosphorous ligands, 13
Phosphorus heterocycles
Titanocene and zirconocene complexes in phosphinine chemistry, 151
Phosphorus–oxygen interaction
Chiral phosphorus(III) triflates. On the nature of the phosphorus–oxygen interaction, 199
Plug flow reactor
New reactors and methods for the investigation of homogeneous catalysis, 143
Polymetallic reagents
Newly designed acylsilanes as versatile tools in organic synthesis, 181
Polypyrrole
Mono and diphosphine borane complexes grafted on polypyrrole matrix: direct use as supported ligands for Rh and Pd catalysis, 219
Pyridinium ylide complexes
Interaction of dihydropyridines with alkoxycarbene complexes of tungsten: formation and use as cyclopropanation reagents of pyridinium ylid complexes, 119
Pyrrolidine
Hydroboration–azide alkylation as efficient tandem reactions for the synthesis of chiral non racemic substituted pyrrolidines, 31

Reduction
New chiral rhenium complexes of unsaturated alcohols: preparation and reactivity, 75
Rhodium
Complexation on rhodium of bidentate and potentially hemilabile phosphorous ligands, 13
Rhodium catalysts
Mono and diphosphine borane complexes grafted on polypyrrole matrix: direct use as supported ligands for Rh and Pd catalysis, 219
Ruthenium
Enantioselective ruthenium-mediated hydrogenation: developments and applications, 163

Silver
Synthesis of enynes and epoxyenynes by coupling: use of a new set of catalysts based on Pd–Ag salts, 173
^{119}Sn-NMR
New synthesis of the nanobuilding block $\{(BuSn)_{12}O_{14}(OH)_6\}^{2+}$ and exchange properties of $\{(BuSn)_{12}O_{14}(OH)_6\}(O_3SC_6H_4CH_3)_2$, 137
Stereochemistry
Stereochemistry in palladium- and nickel-catalyzed addition of phenylmagnesium bromide to unsaturated carbohydrates, 157
Stereoselective synthesis of γ-aminoallyltins from vinyltin acetals, 21
Stereoselectivity
Newly designed acylsilanes as versatile tools in organic synthesis, 181
Supported ligands
Mono and diphosphine borane complexes grafted on polypyrrole matrix: direct use as supported ligands for Rh and Pd catalysis, 219

Tandem reactions
Hydroboration–azide alkylation as efficient tandem reactions for the synthesis of chiral non racemic substituted pyrrolidines, 31
Tetrahydropyran
Organosamariums: preparation using diiodosamarium and reactivity in tetrahydropyran, 39
Theoretical calculations
Optically active nitrogen ligands in asymmetric catalysis. Effect of nitrogen substitution on the enantioselective hydride transfer reduction of acetophenone, 133
Titanocene
Titanocene and zirconocene complexes in phosphinine chemistry, 151
Transition metals
New types of hydrogen bonds, 7

Trialkyltin hydride
Electron transfer catalysis of the hydrogenolysis of acyl dicarbonyl cyclopentadienyliron complexes by tributyltin hydride, 25
β-Tributylstannylacrolein
Stereoselective synthesis of γ-aminoallyltins from vinyltin acetals, 21
Tungsten
Interaction of dihydropyridines with alkoxycarbene complexes of tungsten: formation and use as cyclopropanation reagents of pyridinium ylid complexes, 119

2,3-Unsaturated glycosides
Stereochemistry in palladium- and nickel-catalyzed addition of phenylmagnesium bromide to unsaturated carbohydrates, 157

Vinyl triflate
Synthesis of enynes and epoxyenynes by coupling: use of a new set of catalysts based on Pd–Ag salts, 173

Wittig reaction
New chiral rhenium complexes of unsaturated alcohols: preparation and reactivity, 75

Zirconocene
Titanocene and zirconocene complexes in phosphinine chemistry, 151
